

# Peninsular Malaysia North Route

## Peninsular Malaysia | North Route

The northern peninsular has a diverse range of habitat types to offer including lowland rainforest, montane forest, mangrove forest, mudflats, beaches, scrubland, rocky island outcrops and even some of the best diving in the region. With so much on offer this area will most surely excite and fulfill any nature traveler's holiday. The infrastructure, accommodation, food and the added advantage of English being widely understood makes for an ideal and comfortable birding experience for birders. This tour will comprehensively cover most of the ecological niche habitats of Malaysian birds.
